A. INTRODUCTION

This monthly report covers the period from 28 April to 25 May 2018. The winter rains have finally arrived, and the rainfall has substantially increased from last year. At the end of May 2018, 404mm of rain was recorded in the North region and 220mm was recorded in the South. This is a substantial increase from last year, when 178mm of rain was recorded in the North and 88mm in the South. This increase bodes well for the upcoming months. The baboons have also settled into their winter foraging pattern. This usually results in the troops spending more time in the lower lying areas and sleeping at sleep sites that are more sheltered from the rain.

B. BABOON MANAGEMENT AND RAID REPORTING

SOUTH EASTERN REGION – AREA MANAGER: ZIGGY RODE / CATH SHUTTE

1. SMITSWINKEL BAY TROOP

- The Smitswinkel Troop spent 100% of its time out of the urban area this month.
- Individuals spent 98,6% of time out of the urban area this month.
- The troop predominantly slept in the northern section of its home range (68%).

Figure 1: Smitswinkel Bay Troop raid sheet for May 2018.

Incidents that affected management

Black Marlin Restaurant:

- SWB11, an adult male, raided the Black Marlin Restaurant on only one occasion this month.
- SWB11 gained access to the kitchen, through the open kitchen door and stole food from the kitchen.

2. WATERFALL TROOP

- The Waterfall Troop spent 100% of its time out of the urban area this month.
- Individuals spent 92,4% of time out of the urban area this month.
- Raids on City of Cape Town land accounted for 64% of the total raids this month. The remaining 36% of raids, took place on SA Navy land.

Figure 3: The Waterfall Troop raid sheet for May 2018.

Incidents that affected management

Simon's Town Navy:

- Waterfall Barracks in Simon's Town continues to act as an attractant. Some of the bins at the Barracks
 are baboon-proof bins, however many are broken and when filled over capacity, the locking
 mechanism becomes unusable.
- The lockable waste room door is left open and baboons are able to access the waste inside.
- The residents at the Waterfall Barracks continue to leave windows open. This creates the opportunity for the baboons to enter the apartments to raid.

Waste Removal:

- Waste removal in the Simon's Town continued to be problematic this month.
- The collection of both the waste and recycling was often delayed.
- This exacerbated the baboons raiding behavior because waste was available for longer periods, making it very difficult for HWS rangers to move the baboons away from the urban area.

Figure 4: The various bin storage areas at Waterfall Barracks (a & b) and Military Police (c).

Figure 5: The waste piles and late collection in Simon's Town leads to multiple bin raids on bin days.

3. DA GAMA TROOP

- Time out of town for the troop was 98.5%.
- The troop spent only six nights out of town, sleeping at Witsands.
- Individuals' time out of town was down to 83.1% this month. This can be attributed to fighting amongst the adult males, which resulted in individuals running into the urban area.

Figure 6: The Da Gama Troop's movement for May 2018.

Figure 7: The Da Gama Troop's raid sheet for May 2018.

Incidents that affected management

- Waste collection throughout the month has improved and has been collected in the mornings.
- One adult female displayed unusual behaviour by staying on top of the roof of the flats between two to four hours, after the troop has already left the sleep site.
- On 29 May, DG14 sustained a laceration to his face during a fight with DG18.

Figure 8: DG14 with a laceration to his face after a fight with DG18.

SOUTH EAST REGIONAL SUMMARY:

Births and Deaths

- On 28 April 2018, a new infant was seen in the Waterfall Troop. Two infants were reported in the Da Gama Troop on 4 and 14 May respectively.
- On 2 May 2018, a dead juvenile was reported in the Smitswinkel Troop. The cause of death is infanticide.

Recommendations

- In the interest of more effective baboon management, residents at the naval flats in Da Gama Park should place their refuse bags inside the bins, inside the bin bay and not leave it in front of the gate or on the floor.
- Baboon-proof bins are needed at the West Yard at the Navy docks to prevent baboon raids. The
 cafeteria at the West Yard also needs to be baboon-proofed.
- All vegetable gardens should be baboon-proofed, and residents should refrain from growing fruit trees

in baboon affected areas. Alternatively, all fruit should be removed from fruiting trees.

- Residents at the Waterfall Barracks and Happy Valley Shelter should keep their doors and windows
 closed and their food out of the sight of baboons, when they are not there to prevent raids.
- Law enforcement is urgently needed in the South East to prevent the illegal use paintball markers and pellet guns by residents, who use these to deter baboons.
- If poor waste management at the South African Naval Ammunition Depot (SANAD) and the Waterfall
 Barracks is addressed adequately, baboons will not be able gain access to food so easily and less
 management intervention will be required.
- A **solution** for the 'What's Ya Flava' café in Simon's Town needs to be found, to prevent baboons from raiding the shop, while still making it easily accessible for customers.
- The use of clear recycling bags in baboon-affected areas should be re-evaluated as this remains an attractant for baboons.
- Waste and recycling collection should be prioritised and collected early in baboon-affected areas to avoid becoming an attractant to baboons.

SOUTH WESTERN REGION – AREA MANAGER: CATH SHUTTE

1. GROOT OLIFANTSBOS TROOP (GOB)

In Town Statistics

- The troop spent the majority (86%) of May within the Cape of Good Hope (CoGH) section of the Table Mountain National Park (TMNP).
- While outside the CoGH, the troop slept in the pines at Shamballah (14%).
- The three GOB females, referred to as the GOB individuals, roosted at the Misty Cliffs Sleep Site for the entire month of May.
- These Individuals spent 73,9% of time out of the urban area this month.

Incidents that affected management

Waste Removal:

- Waste removal in the Scarborough and Misty Cliffs area continued to be problematic this month.
- The collection of waste and recycling was often delayed.

Figure 9: GOB Troop raid sheet for May 2018.

2. THE SLANGKOP TROOP

In Town Statistics

- The troop spent 99,8% of time out of the urban area for the month of May.
- Individuals spent 92,9% of time out of the urban area during this month.
- Most time spent in the urban area can once again be attributed to SK8, a sub-adult male.
- Of the 57 raids carried out this month, SK8 is directly responsible for 33% of all raids.
- The troop utilised the Pines behind Ocean View for 71% of the month and the Compass Cliffs Sleep Site for 29% of the month.

Incidents that affected management

Ocean View:

- The close proximity of the troops' preferred winter sleep site, Kali's Pines, to Ocean View continued to result in human/baboon conflict this month.
- Resident children from Ocean View were seen throwing stones and chasing the baboons. The children
 actively seek out the baboons and often follow the baboons up the mountain.

Figure 10: The Slangkop Troop's movements for May 2018.

Rodgers Fruiterers / Peach Pip Farmstall:

- Individual baboons continued to move to Rodgers Fruiterers this month.
- Rodgers Fruiterers do not have lockable baboon-proof bins and the bins are stored outside. This makes it very easy for the baboons to gain access to the HDF's (Human Derived Foods).

Fruit Trees:

- Individual baboons are constantly attracted to the many fruit trees in Ocean View.
- The main areas for concern are Cheetah Road, Comet Road, Laguma Street and Alcor Avenue.

Figure 11: The Slangkop Troop's raid sheet for May 2018.

SOUTH WEST REGIONAL SUMMARY:

Births and Deaths

• On 2 May 2018, a new infant was reported in the Slangkop Troop.

Recommendations

- Management of the Slangkop Troop should improve if the patches of invasive alien plants situated above Ocean View and below the Compass Bakery Sleep Site are removed. This issue has been addressed with South African National Parks (SANParks) and is pending.
- All **fruiting trees or visible fruit** should be harvested from fruit trees in baboon-affected areas so that this is not an attractant for baboons.
- Baboon-proof bins should be used by commercial businesses in Heron Park to prevent raiding.

NORTHERN REGION – AREA MANAGER: STEPHANUS FERREIRA

1. TOKAI TROOP

In Town Statistics

- Time out of town for the troop was 100% for May 2018.
- Time out of town for individuals was 100%.
- The troop mostly slept at the tea garden during this month.

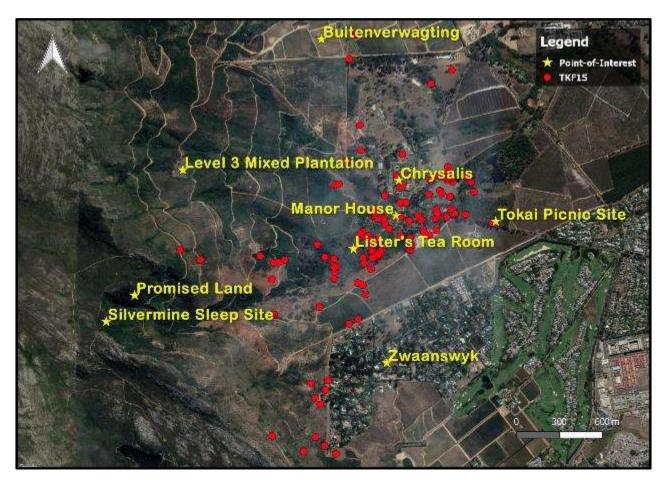

Figure 12: Tokai and Zwaanswyk Troop movements for May 2018. Data from HWS GPS Collar on TKF15.

Incidents affecting management

- On 1 May 2018, six untagged baboons from the Tokai Troop entered the Steenberg Wine Estate at Zone 35. The individuals spent 30 minutes inside the estate before moving back to the upper reservoir.
 No raids were recorded.
- On 10 May MT10, an adult male, was captured and tagged.
- On 25 May an untagged male found a box of unattended oranges at Chrysalis Academy and took a couple.
- MT10 raided an occupied building at Chrysalis and stole a loaf of bread on 15 May.

2. ZWAANSWYK TROOP

In Town Statistics

- Time out of town for the Zwaanswyk Troop was 100% for May 2018.
- Time out of town for individuals was 99.58%
- The troop mostly slept at the Tea garden during May 2018.

Incidents

- On 5 May 2018, TK53 and an untagged female crossed Orpen road and ran to the Cape Academy. HWS rangers managed to prevent them from raiding and they were back with the troop after 25 minutes.
- On 19 May, an untagged male took food from a picnic table at the SANParks' Picnic site in Tokai.

3. CONSTANTIA TROOP 1 (CT1)

In Town Statistics

- Time out of town for the troop was 100% during May 2018.
- Time out of town for individuals was 100%.
- The troop mostly slept at the Upper gums and Bike Trails Sleep sites during this month.

Incidents affecting management

• There were no incidents that affected the management of CT1 during May 2018. The troop stayed out of urban area and no raids were recorded.

Figure 15: Constantia Troop 1 movements for May 2018. Data from HWS GPS Collar on CON15.

4. CONSTANTIA TROOP 2 (CT2)

In Town Statistics

- Time out of town for the troop was 100% during this month.
- Time out of town for individuals was 100%.
- The troop mostly slept at the Buitenverwachting Gums Sleep Site during May 2018.

Incidents

• There were no incidents that affected the management of CT2 during May 2018. The troop stayed out of urban areas and no raids were recorded.

5. MOUNTAIN TROOP

- Time out of town for the troop was 100% during May.
- Time out of town for individuals was 100%.
- The troop mostly slept at the Buitenverwachting Gums Sleep Site during this month.

Incidents affecting management:

• There were no incidents that affected the management of Mountain Troop during May 2018. The troop stayed out of urban areas and no raids were recorded.

NORTH REGIONAL SUMMARY:

Births and Deaths

- There were no births in the North during May 2018.
- There were two deaths in the North during May 2018. On 12 May a dead juvenile was discovered in the CT1 Troop. The cause of death was unknown. On 21 May an untagged blind sub-adult male from the Mountain Troop was euthanased for human reasons, following veterinary assessment.

Recommendations

- The electrified perimeter fence at the SANParks' Tokai Picnic Site should be upgraded and maintained on a regular basis, to prevent baboons from entering the picnic site and raiding picnickers.
- Regular maintenance and upgrades to electrified perimeter fences on wine estates will reduce baboon incursions on wine farms. Regular trimming and removal of overhanging trees and closing of excavations would also reduce baboon access to farms.
- Measures such as storing food in secure areas will aid in a reduction of baboon attractants and lead to reduced raiding at Chrysalis Academy.
- Measures such as the baboon-proofing of private and staff houses on wine estates in the range of the northern troops will aid in a reduction of baboon attractions and lead to reduced raiding on wine farms.
- Regular fence inspection along the Zwaanswyk fence would aid in identifying areas where baboons can gain entry as soon as possible.
- Telephone poles inside Steenberg Wine Estate should be baboon-proofed to prevent baboons utilising these poles to to gain entry into Zwaanswyk residential area.

C. GENERAL COMMENTS ON ALL BABOON TROOPS

1. POPULATION DATA

During May 2018, there were four births and three deaths in the managed troops. The managed population has therefore increased by one, taking the total to 464 individuals. There were four births and one death in the south and no births and two deaths in the north this month.

Table 2: Causes of baboon deaths since 2012 (*Data collected during the first half of 2012 provided by Baboon Research Unit, UCT); **Deaths caused directly by humans such as motor vehicle accidents, shooting, poisoning and dogs. ***Deaths caused indirectly by humans such as electrocutions.

2. HOTLINE DATA

During May 2018, there were 83 raid-related calls in managed areas. This is a decrease of 8 calls from last month (April 2018). The most calls where from Simon's Town, Welcome Glen, Capri and Scarborough. There were no calls from the northern section except for one call from the wine farms.

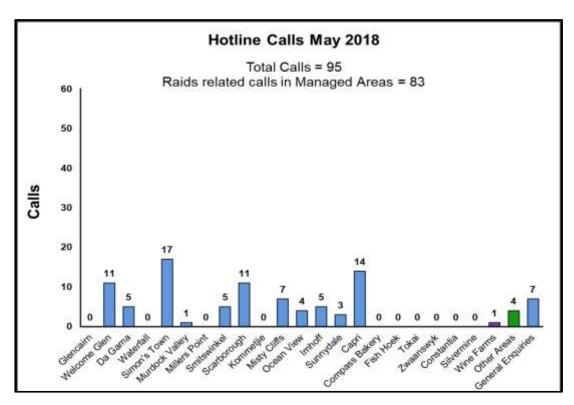

Figure 16: Hotline calls summary per urban area for May 2018.

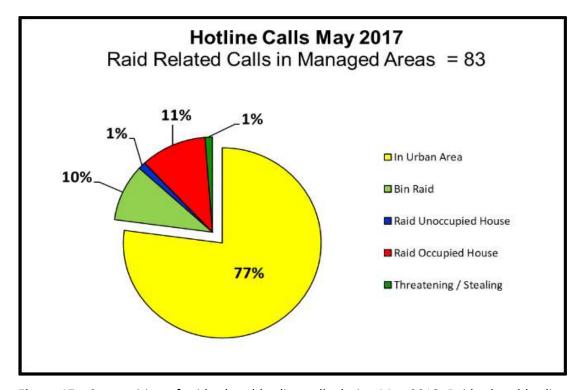

Figure 17: Composition of raid-related hotline calls during May 2018. Raid related hotline calls are calls reporting managed baboons in urban areas. Managed Areas are those areas in which managed baboon troops raid. Other Areas represent those areas, beyond the urban edge or the range of managed baboons.

3. PERCENTAGE TIME OUT OF TOWN

The percentage of time that the troops spent out of town this month remained 99.8%. Only the Da Gama Troop spent more than an hour in town this month, 4.75 hours. The Slangkop Troop spent only 30 minutes in total in town this month. Individuals averaged 94.1% of their time out of town. Individuals from the Waterfall, Da Gama, GOB and Slangkop Troops, again spent more than 5% of time in town this month.

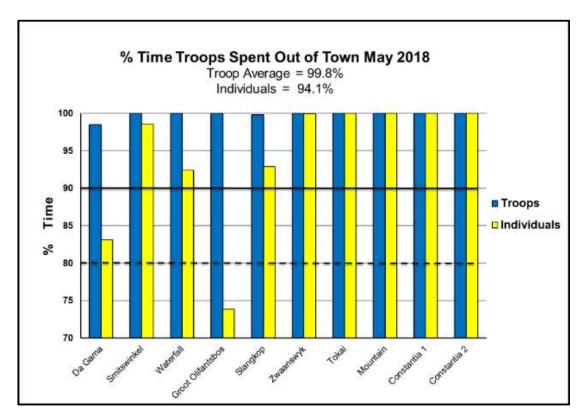

Figure 18: Percentage time troops spent out of town (May 2018). The solid line indicates the City of Cape Town's 2014 contract requirement and the broken line indicates the 2012 contract requirement.

D. CONCLUSION

With winter now in full swing, the baboons have been determined to utilise the lower lying areas for foraging. Individuals in the Da Gama, Waterfall and Slangkop Troops have been pushing hard to gain access to the urban areas and time out of town for individuals has subsequently also decreased to 94.1% for individuals. This situation has been exacerbated by a young adult male in the Slangkop Troop that made several forays into the urban area. The two adult males in the Da Gama Troop have been fighting over dominance and this has led to them entering the urban area, or females running away from them into the urban area.
